

Disposable Polyethylene

Aqua Bailers' disposable polyethylene bailers are made with the highest regard to quality in the marketplace. When you use one of our bailers, you will see the result of a rigorous quality control program and the dedication of a quality-driven staff. Our strict part requirements have virtually eliminated leaking. We pay extra to save you valuable time and effort in the field. The large open-top design allows nearly an inch of open space for easy tie-on. The thick, rigid construction with 100% pure virgin polyethylene guarantees a sturdy bailer with no warping or collapsing. A Double-Check Valve Bailer (also known as a point-source sampler) allows sampling of a specific depth by utilizing a check valve at both the top and bottom of the bailer. [Return to Bailers.](#)
