

# DISPOSABLE FILTERS

## QuickFilter®

*Fast, economical in-line filtration!*

HIGH-CAPACITY  
POLYETHERSULFONE  
GROUND WATER FILTER

**Model No:** QF045

**Area:** 609 cm<sup>2</sup>

**Pore Size:** 0.45 micron

**Max. Pressure:** 60 psi

### BAILER INTERFACE TUBE

Every QuickFilter is packaged with a Bailer Interface Tube. When attached to the filter, the interface tube allows you to insert the cartridge directly into the bottom of the bailer. The snug fit ensures no leaks, and gravity forces low-turbidity water through the filter and into your sample container. No more pressurized bailers, no more pumps, no more transfer vessels. No wonder it's called the QuickFilter.

### CERTIFICATION

All QuickFilter cartridges are certified to exhibit non-detectable levels of the following analytes based on analysis of effluent water using the procedure described below. Analysis is performed by an outside independent testing laboratory utilizing standard US EPA methods.

Element	MDL (mg/L)	Element	MDL (mg/L)	Element	MDL (mg/L)	Element	MDL (mg/L)
Aluminum	0.040	Calcium	0.03	Lead	0.002	Selenium	0.004
Antimony	0.002	Chloride	1.0	Magnesium	0.02	Silver	0.0002
Arsenic	0.001	Chromium	0.001	Mercury	0.0002	Sodium	0.040
Barium	0.005	Cobalt	0.001	Molybdenum	0.005	Sulfate	0.025
Beryllium	0.0002	Copper	0.004	Nickel	0.002	Thallium	0.002
Cadmium	0.0002	Iron	0.01	Potassium	0.1	Zinc	0.005
