

N-DEX® Original, N-DEX® Plus & N-DEX® Ultimate

Best Manufacturing Company

579 Edison Street

P.O. Box 8

Menlo, GA 30731-0008

Not all disposable nitrile gloves are created equal. The original and still unequalled N-DEX® by Best continues its revolutionary ways since its introduction in 1992 as the world's first 100 percent nitrile, non-latex disposable glove. Manufactured by Best with a patented low modulus formulation, the family of N-DEX® hand protection provides automotive, dental, EMS, food handling and processing, healthcare, lab, and pharmaceutical professionals unmatched dexterity and a significant reduction in hand fatigue. The four-, six- and eight-mil (one mil=1/1000 of an inch) style N-DEX® gloves provide superior comfort and barrier protection against a variety of chemicals, greases, oils and blood borne pathogens. Available in either a light powder style for easy donning and doffing or a powder-free version, ideal for food handling and packaging, N-DEX® remains a tough act to beat.
