800-393-4009

The Accuro Gas Analysis Equipment is an extremely simple pump which is even easier to hold thanks to its new ergonomic shape. An integrated stroke counter guarantees the correct working volume which shows up on a clear optical pressure operated display.

No special tools or screws are needed for maintenance and cleaning as all parts are pushed together. The system is used for gas sampling from compressors and chambers via a gas bladder or through the 'test cube'.

FEATURES

Bellows design for optimal flow and volume

Accurate, repeatable results

Built-in stroke counter

Records number of strokes

Ergonomic Design

Easy to hold and squeeze

One-hand operation

Ergonomically contoured for comfort

Easy-to-read end of stroke indicator

Eliminates incomplete measurements

Built-in Opener

Scores the tube tips for smooth, clean breaks

Corrosion-resistant materials

For years of reliable service

Low maintenance

No special tools required
