CLEARVIEW

Hydrocarbon PVC Bailer

"Your Needs Are Our Business"

Toll-Free
800-393-4009

The Clear-View Hydro-Bailer is designed for the collection of hydrocarbon liquids or LNAPL (light non-aqueous phase liquids).

The bailer is designed with a larger diameter inlet section which reduces surface tension. When lowered into the product layer and retrieved slowly the polyethylene ball valve allows water to escape but leaves a free product sample within the bailer.

These bailers are Ideal for obtaining product-only samples and provide a visual identification of the product thickness within a borehole. This a low cost manual method for collecting LNAPL and very simple to use.

Hydro-Bailers are available in the following sizes:

.70" x 3'

1.5" x 1'

1.5" x 3'

1.5" x 4'

1.5" x 7'

3.33" x 3'
