

ClearView Teflon Bailers

Benefits:

- Strait Clear
- No weights to restrict flow of sample entering and exiting the bailer
- High quality assembly
- Meets industry standards for sampling volatile substances
- Price

Material:

- Virgin Teflon® tubing, tops and bottoms

Specially Designed Tops:

- Allowing samples to be poured accurately, with little or no splashing
- Strong ridged tethering attachment for secure fastening of bailer rope
- Each part is press fitted and double welded, to assist in the bonding of tube to top device

Specially Designed Bottoms:

- Redesigned ball seat helps to deter sticking of ball, with out sample loss, between ball and device
- Large .65 inch opening allowing for large volumes of product to rapidly fill the bailer with minimal disturbance to the sample. Also speeds up sampling and or purge time, thus saving money
- Each part is press fitted and welded, for little or no leaking between tube and bottom device

Sizes: Volume:

1.5" x 1' 342 mL
1.5" x 3' 1025 mL
