

# clear innovation

**EcoBailers offer great value and features at a very affordable price. Available in clear PVC & Polyethylene, EcoBailers are designed with a larger spout opening that allows water to flow more rapidly through the bailer. This results in a faster sink rate while creating less aeration of the well sample. Clear PVC EcoBailers sink as fast as traditional weighted bailers without the added cost. Polyethylene EcoBailers feature a thicker tube wall that's straighter and less likely to bend than other bailers.**

## features

- Clear PVC EcoBailers sink rapidly in water without requiring additional weights
- Polyethylene EcoBailers feature a thicker tube wall that's straighter & less likely to bend than competing bailers
- Longer bottom spout helps prevent silt from interfering with check ball and causing leakage
- Custom emptying device regulates sample flow into vial
- VOC Tips available for 1.5" & .70" diameter bailers
- Available in all popular sizes and types

### STANDARD BAILERS

1.5"x1' disposable PVC & Polyethylene  
1.5"x3' disposable PVC & Polyethylene  
1.5"x4' disposable PVC  
3.3"x3' disposable PVC

### WEIGHTED BAILERS

1.5"x1' disposable PVC & Polyethylene  
1.5"x3' disposable PVC & Polyethylene  
1.5"x4' disposable PVC & Polyethylene

### PENCIL BAILERS

.45"x1' disposable PVC  
.70"x3' disposable PVC

### SPECIALTY BAILERS

1.5"x1' Hydrocarbon Recovery disposable PVC  
1.5"x1' Discreet Sampling disposable PVC  
1.5"x3' Hydrocarbon Recovery disposable PVC  
1.5"x3' Discreet Sampling disposable PVC
