

# FEI Atlanta Booth #513

## Environmental rental equipment, supplies and service.

### FEATURED AT THE BOOTH: THE EVOLUTION OF GROUNDWATER SAMPLING TECHNOLOGY

FEI team members throughout the United States proactively meet with manufacturers as they seek revolutionary technology for customers.

Just this year FEI Los Angeles began working with a firm that has designed the most innovative groundwater sampling technologies we've seen to date. BESST, Inc.'s Darwin Pump Series exceeds expectations of every customer that has deployed them. Now customers nationwide are witnessing the value of implementing this pump technology.

The requirements of each groundwater sampling event have varied, proving the technology's adaptability and flexibility.

- ▶ Fewer parts minimize breakdowns in the field
- ▶ Durable materials prevent erosion during long-term use
- ▶ Materials withstand the harshest environments
- ▶ Volume boosters pump water in a fraction of the time traditional pumps require

Stop by our booth and talk to Andre Al-Ghani, FEI Atlanta Branch Manager, about the pumps, our industry leading Real-Time Data Solutions, and the instruments and equipment available to you through FEI's customer-centric rental program.

*FEI is proud to be the exclusive distributor of BESST, Inc.,  
Groundwater Sampling Technologies.*

**Free local delivery and pick-up | Equipment demos and training  
24-hour technical support | 9 full-service offices nationwide**
