ENVIRONMENTAL EQUIPMENT AND FIELD SUPPLIES

Reliable Equipment for Project Success.

Rental equipment is great...when it works. When it doesn't, your project suffers delays which can cost you thousands of dollars and hours of time.

FEI has built its reputation as the industry's most reliable environmental equipment rental company.

We continue to set the standard:

- You get the equipment you need, when you need it.
- Your equipment arrives one day before the rental start date, so you have time to review your order.
- Because of quality control measures, your equipment is shipped in optimal working condition.
- Thorough review of orders before they are fulfilled ensures all manuals, calibration certificates, and packing slips are included.
- In the event equipment is compromised during shipping, FEI's tech support staff is always a phone call away.
