Hydrolab's ***Quanta***

- Temperature • Dissolved Oxygen • pH •
- Specific Conductance • Turbidity •

The Quanta is designed for monitoring in rivers, lakes, streams, oceans, & everything in between. When equipped with the optional flow cell, it can be used to monitor water quality parameters in ground water as well.

The Quanta display is durable, rugged, and rated NEMA 6 (waterproof), capable of storing 200 frames of data, and shows five parameter values at once.
