

Oily Waste Cans

FOR GENERAL USE

Dispose of oil-soaked rags and protect your facility from fires that can start due to:

- Spontaneous combustion
- Sparks
- Careless use of smoking material

OSHA Compliant Oily Waste Cans are essential whenever solvent cloths and wiping rags are used. Rags and cloths soaked with solvents, thinners, linseed oil, combustible adhesives and other flammable liquids present a serious fire risk when improperly discarded. The specially designed lid opens no more than 60 degrees and stays closed when not in use, isolating contents from fire sources and limiting oxygen so spontaneous combustion risk is virtually eliminated. Round construction and elevated bottom encourage circulation of air around can to disperse heat and reduce moisture buildup and rusting.

A variety of sizes accommodate your specific need. Choose either red or yellow, or both when color identification is desired to help segregate materials or to differentiate department location sites. All feature galvanized steel body construction with a durable powder paint finish. Most sizes are also offered with a hand-operated cover if preferred.

Carry handle for portability.

Self-closing cover reduces oxygen source to prevent fire from starting.

Reinforcing ribs protect sides from dents and abuse.

Rugged, lead-free galvanized steel body.

Bright red (or optional yellow) warning color.

Trilingual safety label reduces miscommunication.

Round construction and raised, flow-through base dissipates heat.

Popular foot-operated models leave hands free. Cover snaps shut when pedal is released.

One-piece cover facilitates use of disposal collection bags.

Durable powder paint finish for long life.

Red Oily Waste Cans

Description and Capacity

2 gallon countertop oily waste can	9 5/8" x 9 1/8"	FM	09200
6 gallon oily waste can with foot operated cover	11 7/8" x 15 7/8"	FM,UL	09100
