

Type I Safety Cans are the economical choice for flammables.

Compliant Type I safety cans are designed with a single spout for filling and pouring. The self-closing, leakproof lid provides security from spills and leaks. Cans up to one gallon feature a trigger release handle while larger capacities have a swinging handle to greatly ease carrying heavier loads. Unique counterbalance, ergonomic design with full-fisted grip handle offers gravity-assisted pouring. All models are equipped with an FM-tested dual-density flame arrester, which reliably dissipates heat to stop flashback ignition. To protect against rupture or explosion, positive pressure relief mechanism automatically vents between 3 and 5 psig.

Heavy-duty, high grade coated steel construction features special reinforcing ribs to strengthen sidewalls for extra "bumper guard" protection. Finished in a tough powder coat paint, Justrite cans resist chemicals and standup to heavy abuse. It meets OSHA and NFPA requirements, is certified by FM, UL, ULC, and carries an exclusive Justrite Ten-Year Warranty.
