Field Environmental Instruments Inc. Launches New Office in Kansas City

Kansas City, Missouri (July 15, 2007) - With FEI's July 15, 2007, opening of their second office within the central United States, customers can now expect and experience a level of service and value added to their environmental equipment rental and supply needs.

"We are excited by the response thus far with our expansion into the Kansas City market. We believe FEI has been a leader of exceptional service and quality within our industry for 10+ years, and we remain dedicated to that mission," according to Anthony Visco, Partner of Field Environmental Instruments, Inc.

Our Kansas City operation will be under the leadership of local Entrepreneur and well respected businessman Gary Yamron. Mr. Yamron's background spans over 20+ years in successful businesses His companies developed, implemented and manufactured consumer products for Fortune 500 companies. His experience and acute business acumen will be a vital source for FEI's continued growth.

Gary T Yamron – as the Kansas City Principal will administer FEI's efforts in both Kansas City and across the Central United States. He reiterated "that Kansas City's debut supports FEI's long-range commitment to strategically expanding the company's resources along the central corridor while securing a team of exceptional support personnel for continued growth."

Mitchell Brouman, Partner, said "that Field Environmental Instruments' Kansas City presence also constitutes a vital link with the company's strategy of acquiring a larger foothold in the Central United States marketplace. The new office will have an inventory specialized for our clients in the area. Service includes our same day delivery and pickup and next day shipping in the Central U.S. Customized service is what we strive for everyday. It has been part of our success as much as our clients. As always, we look forward to helping our clientele with our continued customer support and service."
