### Low Flow Sampling Controller

The ProActive Low Flow Sampling Controller is engineered specifically for standard pumps such as the Mini-Typhoon, Mini-Monsoon and Tempest.

This device is used for low-flow sampling by allowing the technician to sample as low as 40ml/min. The technician has the ability to either use this controller to sample wells in accordance to EPA field sampling guidelines.

Simply hook the controller to a car battery and connect the pump to the Controller, turn on device with the on/off switch on the side and sample with total control over the pumping volume.
