

PROACTIVE ENVIRONMENTAL PRODUCTS-PROACTIVE PUMPS

Engineered specifically for Mega-Typhoon

The ProActive Low Flow with Power Booster I Controller is engineered specifically for Mega-Typhoon high performance pump. This “Combo” Device will boost 12 volts to a constant 19 volts, thus maximizing purging efforts. This device can also be used to achieve low flow sampling and lets the technician sample as low as 40ml/min. Finally, the technician now has the ability to either use this Controller to sample wells in accordance to EPA field sampling guidelines.

Simply hook the controller to a car battery and connect the pump to the Controller, turn on device with the on/off switch and stand back for awesome pumping power! And with the revolutionary variable speed dial, you have total control over the pumping volume...

Features

Heavy duty steel weatherproof case

Low voltage disconnect at 11 volts (turns off controller at 11 volts to let user know that battery voltage is low and needs charging)

Constant Voltage Boosting (CVB) Technology allows the correct voltage to reach the pump motors.

5 amp "safety" fuse to protect electronics and user

Outstanding warranty: Includes 6 months parts and labor

Low flow sampling dial with convenient on/off switch

PROACTIVE ENVIRONMENTAL PRODUCTS-PROACTIVE PUMPS

Three foot wire lead to battery clamps and three foot wire lead to pump connector

Steel handle for comfort and control
