12 Volt Portable Battery Pack

Don't let the smallest of power source units mislead you by it's size. With its 12 ampere hour battery this baby packs some power. Compact, lightweight and easily transportable it's perfect for on the go action and it still retains a lot of the same features as it's bigger brothers.

- Easy to read battery status LEDs tell when internal battery is at full power, 75% charged or 50% or less. A simple push of the botton instantly turns on the LEDs.
- Sure -grip, copper jaw, 200 amp, plastic clamps for connecting to top and side post batteries.
- #8 gauge, 18" cable stays flexible in the cold temperatures.
- Charging and Charged LED indicator to help easily monitor the charging of the internal battery.
- Storage mounts on the back of unit to keep clamps in place for safety when not in use.
