THE PROTECTUS® METHOD FOR COST-EFFECTIVE TREATMENT OF GROUNDWATER CONTAMINANTS

Slowly released into groundwater, Protectus® technology provides a continuing source of agents necessary to promote indigenous degradation.

PROTECT-ORS™ (ORS SLEEVE)

Protectus® ORS (ORS Sleeve) technology is a proprietary field-proven source of dissolved oxygen and inorganic nutrients to enhance the aerobic biodegradation of groundwater contaminants such as refined hydrocarbons including jet fuel, gasoline, and related compounds.

Protectus ORS™/ISCR Sleeve & Canister

PROTECT-IR® (ISCR SLEEVE)

Protectus® Protect-IR® (ISCR Sleeve) technology is a unique mixture of reagents combined into a single product that optimizes the in-situ reductive dechlorination of chemicals present in soil, sediment, and groundwater. It acts by promoting synergistic interactions between natural antimethanogenic compounds including hydrophilic, nutrient rich organic carbon sources; Zero-Valent; Iron (ZVI); chemical oxygen scavengers; and, vitamin and mineral sources.
