

WATERRA LEVER PUMP

The **Waterra Lever Pump** was designed to provide operators with a convenient, portable mechanism which would provide some mechanical advantage when manually operating the **Inertial Pump** as well as facilitating the collection of samples with this system.

This actuator will fasten onto most above ground well completions quickly and easily. The tubing clamp is designed to accept both **Standard Flow and High Flow tubing** and the handle is adjustable in order to accommodate various casing diameters and desired stroke lengths. The **Lever Pump** weighs approximately 7 pounds.

This actuator is the best choice for the occasional light duty user of the **Inertial Pumping System**.
