

Leading the Real-Time Data Revolution.

Field Data Solutions (FDS) and Field Environmental Instruments (FEI) combine forces to bring the most comprehensive site monitoring solution to the environmental industry. We are happy to schedule a time to demo the FDS Real-Time Data Network and talk about how the FEI Built to SPEC (Special Project Engineers and Consultants) team can support your next project.

FIELD DATA SOLUTIONS REAL-TIME DATA NETWORK

- ▶ Wireless connectivity with power options (solar, fixed, battery, wind).
- ▶ Latest instrumentation including sensors, detectors, gauges and monitors from leading manufacturers.
- ▶ Low-power, self-healing radio mesh network for ongoing data collection.
- ▶ Data management platform and reporting options are tailored to your project needs and delivered through a secure web-user interface in real time.

FIELD ENVIRONMENTAL INSTRUMENTS BUILT TO SPEC

- ▶ Project consultation and system engineering at the beginning of your project ensures the real-time data network meets your project specific requirements.
- ▶ Unmatched installation, technical support and training is best in the business.
- ▶ One rep responsibility and a complete inventory mean superior service.
- ▶ 8 full-service branches provide support nationwide; free local delivery saves the bottom line.
