

Sealing & Chemical Barrier Materials for Well & Drilling Applications

Still Using Bentonite Pellets or Chips for Monitoring Wells or Hole Abandonment?

HoleBlok provides the following benefits:

- Higher Percent Solids – produces a self-compacting seal at bottom of annular area
- Less Mechanical Bridging – pebble shape minimizes sharp angles
- No “Blinding-Off” of Bentonite Center – as has been shown with core of pellets
- Faster Drop Velocity – more than 30% faster than chips
- Higher Mass and Bulk Density
- Maintains Structural Support Of Seal In Vadose Zone
- All HoleBlok products can be delivered by Tremie, if required

Better Than Chips. Lower Price Than Pellets.

HoleBlok+ -- Adds ZVI to Address Potential Rebound or Grout Contamination at Injection Sites or in Monitoring Wells. Available in Standard 3/8" and 1/4" Sizes.

HOLEBLOK (PREPACKAGED 50-LB. BAGS)	PRICE (PER BAG)
1/4" HoleBlok 50-lb Bag	\$26
3/8" HoleBlok 50-lb Bag	\$22
1/4" HoleBlok+ 50-lb Bag	\$34
3/8" HoleBlok+ 50-lb Bag	\$30
