Rugged. Versatile. Smart. Just \$1,250 for the complete ready-to-test kit.

Hanna's HI98194 field kit includes: HI98194 IP67-rated field meter, IP68-rated probe and 13 ft. cable, pH/ORP, DO, and EC sensors, maintenance kit, micro USB cable, and batteries. All stored conveniently in a rugged carrying case.

Introducing the HI98194

Hanna's toughest portable meter is waterproof and built to withstand harsh outdoor environments.

Functional and accurate, this meter is capable of testing 12 different water quality parameters. At just 14.2 ounces, the HI98194 is easy to take with you making it the perfect travel companion.

Complete field kit

Hanna believes that buying a testing solution should be simple. The HI98194 is equipped with everything you need for successful testing out in the field. There are no surprise add-ons or unexpected costs. Our convenient rugged carrying case safely stores all of your testing essentials in one place. This makes it easy to take with you wherever you go.

Built tough

Manufactured with rugged components, the HI98194 is durable in its design and offers waterproof protection. Enclosed in an IP67 rated waterproof casing it can be immersed in water at a depth of 1m for up to 30 minutes. The probe features an IP68 rating making it the ideal field meter.

Our HI98194 is capable of testing up to 12 water quality parameters with one meter including pH, ORP, TDS, DO, conductivity and temperature.

Smart features

Nothing comes close to the HI98194 in terms of smart technologies. This portable meter allows users to store up to 45,000 continuous or log-on-demand samples with logging intervals from one second to three hours. Quick one-step calibration, automatic temperature and pressure compensation make the HI98194 easy to use.

Simple operation

Hanna's HI98194 meter is easy to operate with its intuitive keypad design and dedicated help key. Tutorials and directions are always available at the touch of a button making this meter user-friendly.
