RoHS/Compliance Testing Getting Started Guide

WIND-10025

- Check your instrument window: Is the correct window installed? (1) Is it intact? Clean it with an alcohol/wet wipe.
- Check your Test Times, Beam Classification, and Test End Condition (2) settings (right)
- Customize your Method Display settings to meet the needs of your (3) testing procedure (lower right) M-Series: Prolene
- Make sure User Factors is turned off (set to None), unless needed. (4)
- Have the collimator turned off unless specifically needed (below). (5)
- Enable a RoHS Notes template if metadata to accompany test (6) results is needed.
- Select RoHS export template with an appropriate RoHS template (7) Export to USB memory stick for C-Series: under Export Settings. Kapton Mesh convenience.
