## PROTIMETER

**Survey Master  
Moisture Meter**

*"Your Needs Are Our Business"*

Toll-Free  
**800-393-4009**

The Protimeter Surveymaster SM moisture meter combines the conventional two-pin inspection method, with a non-invasive radio frequency technique. This enables the user to assess the moisture condition not only on the surface, but also at depth quickly and non-destructively.

The Search Mode uses the same colour coded LED scale as the Measure mode, identifying degrees of dampness below the surface. There is also a user adjustable Audible Alarm that sounds to indicating the varying levels in moisture. In this mode the instrument employs radio frequency emissions (RFE) to measure moisture through most wall and floor coverings, including ceramic tiles.

The two-pin Measure Mode identifies by means of green, yellow and red LEDs whether a surface is in a safe i.e. air-dry, borderline or damp condition. The dampness measured is quantified on an LCD display to one decimal place in terms of % wood-moisture-equivalent (%WME).

## ORDERING INFORMATION

Field Environmental Instruments  
99 Miller Avenue  
Braddock, PA 15104
