**Oil/Water  
Interface Meter**

*"Your Needs Are Our Business"*

Toll-Free  
**800-393-4009**

**THE WORLDS ONLY** small diameter (7/16 OD) Interface Meter for 1/2" ID or 12 mm ID wells to detect floating or sinking hydrocarbons down to 1/2 mm or 1/200 of a foot.

Get quick readings through heavy oils while preventing false readings and state-of-the-art electronics will also correct for a severely damaged optical sensor.

Tapes meet or exceed federal specification US GGG-T-106E (U.S.A.) or EEC CLASS II (Europe) for a guaranteed accuracy of .008%. Also available with a 5/8 diameter stainless steel probe which has all of the features of the smaller 7/16 diameter probe. Both units have an automatic shut off after 10 minutes.

Two separate sensitivity controls for the water sensing and fluid sensing circuits allow the user complete control over the performance of the instrument.

### **SPECIFICATIONS**

- Power 9 volt battery
- Shipping weight 8 lbs
- Tape lengths 50 - 2000 ft (15-600m)
- Tape material Kynar or Polyethylene
- Probe diameter 7/16 or 12mm or 5/8 or 15mm
