Section 1. IDENTIFICATION

1.1. Product identifier
Product form: Mixture
Product name: Carbon Monoxide (0.0001%-0.0999%); Carbon Dioxide (0.0001%-5.0%) in Air (Oxygen 20.9% bal. Nitrogen)

1.2. Relevant identified uses of the substance or mixture and uses advised against
Product use: Calibration gas/Bumptest gas/Function test gas

1.3. Details of the supplier of the safety data sheet
Intermountain Specialty Gases
520 N. Kings Road
Nampa, ID 83687
Telephone 1-208-466-9425 or Toll free 1-800-552-5003
Fax 1-208-466-9144
www.isgases.com

1.4. Emergency telephone number
Emergency number: CHEMTREC: 1-800-424-9300

Section 2. HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture
Classification: GASES UNDER PRESSURE - Compressed gas

2.2. Label elements
Hazard pictograms
Signal word: WARNING
Hazard statements: H280 - CONTAINS GAS UNDER PRESSURE; MAY EXPLODE IF HEATED
: CGA-HG24 - MAY SUPPORT COMBUSTION
: OSHA - PG01 - DO NOT REMOVE THIS PRODUCT LABEL

Precautionary statements
[General]: Read and follow all Safety Data Sheets (SDS's) before use. Read label before use. Keep out
of reach of children. If medical advice is needed, have a product container or label at hand. Use equipment rated for cylinder pressure.

[Prevention] : P202 - Do not handle until all safety precautions have been read and understood
 : P271+P403- Use only outdoors or in a well-ventilated area

[Response] : P304+P340 - If inhaled: Remove person to fresh air and keep comfortable for breathing.
 : P313 - Get medical advice/attention.

[Storage] : CGA-PG02 - Protect from sunlight when ambient temperature exceeds 52°C (125°F)

[Disposal] : Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

2.3. Other hazards
No additional information available

2.4. Unknown acute toxicity
No data available

Section 3. COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substance
Not applicable

Section 4. FIRST AID MEASURES

4.1. Description of first aid measures

General : IF exposed or concerned: Get medical advice/attention.

Inhalation : Remove to fresh air and keep at rest in a position comfortable for breathing. If breathing has stopped, give artificial respiration or oxygen by trained personnel. If victim feels unwell, seek medical advice.

Skin contact : Immediately flush with copious amount of water for at least 15 minutes.

Eye contact : Immediately flush with copious amount of water for at least 15 minutes.

Ingestion : Ingestion is not considered a potential route of exposure, refer to the inhalation section.

4.2. Most important symptoms/effects, acute and delayed

Acute

Inhalation : Adverse effects not expected from this product.
**Carbon Monoxide (0.0001%-0.0999%); Carbon Dioxide (0.0001%-5.0%) in Air (Oxygen 20.9% bal. Nitrogen)**

**Eye contact**: Contact with rapidly expanding gas may cause burns or frostbite.

**Ingestion**: Ingestion is not considered a potential route of exposure, refer to the inhalation section.

**Frostbite**: Thaw frosted parts with lukewarm water. Do not rub affected areas. Get immediate medical advice/attention.

**Skin contact**: Contact with rapidly expanding gas may cause burns or frostbite.

**Symptoms/injuries upon intravenous administration**: Symptoms of overexposure are dizziness, headache, tiredness, nausea, unconsciousness, cessation of breathing.

**Chronic symptoms**: Adverse effects not expected from this product.

**Delayed**: Adverse effects not expected from this product.

**4.3. Indication of any immediate medical attention and special treatment needed**

If victim feels unwell, seek medical advice. If breathing is difficult, give artificial respiration or oxygen by trained personnel.

**Section 5. FIREFIGHTING MEASURES**

**5.1. Extinguishing media**

<table>
<thead>
<tr>
<th>Suitable extinguishing media</th>
<th>Use extinguishing media appropriate for surrounding fire.</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

**5.3. Advice for fire-fighters**

**Firefighting instructions**: In case of fire: Evacuate all personnel from the danger area. Stop the leak and flow of gas before extinguishing fire, if safe to do so. If this is not possible, withdraw from area and allow fire to burn. Fight fire remotely due to the risk of explosion. Use water spray or fog for cooling exposed containers. Let the fire burn. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas. Exercise caution when fighting any chemical fire.

**Protection during firefighting**: Standard protective clothing and equipment (e.g., Self Contained Breathing Apparatus, SCBA) for fire fighters. Do not enter fire area without proper protective equipment, including respiratory protection.

**Section 6. ACCIDENTAL RELEASE MEASURES**

**6.1. Personal precautions, protective equipment and emergency procedures**

**General measures**: Ensure adequate ventilation.

**6.1.1. For non-emergency personnel**

**Protective equipment**: Wear protective equipment consistent with the site emergency plan.

**Emergency procedures**: Escape the danger area by the closest safe route. Close doors and windows of adjacent premises. Keep containers closed. Mark the danger area. Seal off low-lying areas. Keep upwind.

**6.1.12. For emergency responders**
Protective equipment: Standard protective clothing and equipment (e.g., Self Contained Breathing Apparatus) for fire fighters. Equip cleanup crew with proper protection.

Emergency procedures: Evacuate and limit access. Ventilate area. See information above "For non-emergency personnel".

### 6.2. Methods and material for containment and cleaning up

For containment: Immediately contact emergency personnel. Try to stop gas leak if safe to do so.

Methods for cleaning up: Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

### Section 7. HANDLING AND STORAGE

#### 7.1. Precautions for safe handling

Precautions for safety handling: Pressurized container: Do not pierce or burn, even after use. Use equipment rated for cylinder pressure. Do not handle until all safety precautions have been read and understood. Use only outdoors or in a well-ventilated area. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Protect cylinders from physical damage; do not drag, roll, slide, or drop.

Hygiene measures: Do not eat, drink or smoke when using this product.

#### 7.2. Conditions for safe storage, including any incompatibilities

Technical measures: None known.

Storage conditions: Do not expose to temperatures exceeding 52°C (125°F). Store locked up. Keep containers closed when not in use. Protect cylinder from physical damage. Store and use away from heat, sparks, open flame or any other ignition source. Store in well ventilated area.

Incompatible products: None known.

Incompatible materials: None known.

### Section 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Nitrogen (7727-37-9)

8.2. Appropriate engineering controls

Engineering measures/controls: Provide adequate general and local exhaust ventilation. Systems under pressure should be regularly check for leakages. Ensure exposure is below occupational exposure limits. Oxygen detectors should be used when asphyxiating gases may be released. Consider work permit system e.g. for maintenance activities.

8.3. Individual protection measures

- Skin and body protection: Wear suitable protective clothing, e.g.-Lab coats, coveralls or flame resistant clothing.
- Respiratory protection: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.
- Thermal hazard protection: None necessary during normal and routine operations.
- Environmental exposure controls: Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.
Section 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Exposure controls

Appearance: Clear, colorless gas.
Physical state: Gas
Color: Colorless
Odor: No data available
Odor threshold: No data available
pH: No data available
Freezing point: No data available
Flash point: No data available
Evaporation rate: No data available
Flammability (solid, gas): Not Flammable - not combustible
Upper flammability: Not Flammable - not combustible
Lower flammability: Not Flammable - not combustible
Relative density: No data available
Solubility: No data available
Partition coefficient: No data available
Auto-ignition temperature: No data available
Decomposition temperature: No data available
Viscosity: Not applicable

Section 10. STABILITY AND REACTIVITY

10.1. Reactivity

No reactivity hazard other than the effects described below.

10.2. Chemical stability

Stable under normal conditions.

10.3. Possibility of hazardous reactions

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

10.4. Conditions to avoid

Due to the presence of Carbon dioxide, Carbonic acid is formed in the presence of moisture.

Other information: Wear safety shoes while handling containers. 29 CFR 1910.136: Foot Protection
10.5. Incompatible materials
Carbon dioxide is incompatible with: Certain reactive metals, hydrides, moist cesium monoxide, or lithium acetylene carbide diammino may ignite. Passing carbon dioxide over a mixture of sodium peroxide and aluminum or magnesium may explode.

10.6. Hazardous decomposition products
Oxygen. Carbon monoxide (CO)

Section 11. TOXICOLOGICAL INFORMATION

Acute toxicity

Nitrogen (7727-37-9)
LC50 inhalation rat (ppm) 410,000 ppm/4h

Oxygen (7782-44-7)
LC50 inhalation rat (ppm) 400,000 ppm/4h

Carbon dioxide (124-38-9)
LC50 inhalation rat (ppm) 470,000 ppm/4h

Carbon Monoxide (630-08-0)
LC50 inhalation rat (ppm) 3,760 ppm/1h
LC50 inhalation rat (ppm) 1,807 ppm/4h

11.1. Information on routes of exposure
Inhalation: Acidosis, adrenal cortical exhaustion, and other metabolic stresses have resulted from prolonged continuous exposure to 1-2% carbon dioxide (10,000 ppm-20,000 ppm). The ACGIH TLV of 5,000 ppm is expected to provide a good margin of safety from asphyxiation and undue metabolic stress provided sufficient oxygen levels are maintained in the air. Increased physical activity, duration of exposure, and decreased oxygen content can affect systemic and respiratory effects resulting from exposure to carbon dioxide.

Skin contact: Adverse effects not expected from this product
Eye contact: Adverse effects not expected from this product
Ingestion: Ingestion is not considered a potential route of exposure

11.2. Symptoms related to physical, chemical and toxicological characteristics
Symptoms
Simple asphyxiant. May cause suffocation by displacing the oxygen in the air. Exposure to oxygen-deficient atmosphere (<=18%) may cause dizziness, drowsiness, nausea, vomiting, excess salivation, diminished mental alertness, loss of consciousness and death. Exposure to atmospheres containing 8-10% or less oxygen will bring about unconsciousness without warning and so quickly that the individuals cannot help or protect themselves. Lack of sufficient oxygen may cause serious injury or death. Depending on concentration and duration of exposure to carbon dioxide may cause increased respirations, headache, mild narcotic effects, increased blood pressure and pulse, and asphyxiation. Symptoms of overexposure become more apparent when atmospheric oxygen is decreased to 15-17%.
11.3. Delayed and immediate effects

Skin corrosion/irritation: Contact with rapidly expanding gas may cause burns or frostbite.
Serious eye damage/irritation: Contact with rapidly expanding gas may cause burns or frostbite.
Respiratory or skin sensitization: Not classified
Germ cell mutagenicity: Genetic changes observed in mammalian cell assay systems at exposures of 1,500 to 2,500 ppm of carbon monoxide for 10 minutes
Carcinogenicity: Not classified
Reproductive toxicity: Category 1A. Overexposure to carbon monoxide may decrease the likelihood of successful pregnancy. In rats treated with carbon monoxide, the rate of successful pregnancy in the control group was 100% whereas the rest of successful pregnancy in animals treated with 30 and 90 ppm of carbon monoxide was 69% and 38% respectively.

Developmental Toxicity
Mice exposed to concentrations of carbon monoxide at 65 ppm and higher demonstrated doe-dependent effects on the fetus (increased mortality and decreased weight) with no signs of maternal toxicity. Offspring of rats exposed to 150 ppm carbon monoxide had minor reductions in birth weight and persistent memory deficits which became more pronounced in adulthood.

Specific target organ toxicity (single exposure): Respiratory system, Central vascular system (CVS) (carbon dioxide)
Specific target organ toxicity (repeated exposure): Genetic changes observed in mammalian cell assay systems at exposures of 1,500 to 2,500 ppm of carbon monoxide for 10 minutes
Aspiration hazard: Not classified
Not applicable for gases and gas-mixtures

11.4. Carcinogenic effects
The components of this material are not found on the following lists: FEDERAL OSHA Z LIST, NTP AND IARC; therefore, they are not considered to be, nor suspected to be, cancer-causing agents by these agencies.

Section 12. ECOLOGICAL INFORMATION

12.1. Aquatic Toxicity
Ecology - general: No ecological damage caused by this product

12.2. Persistence and degradability
No information available for the product

12.3. Bioaccumulative potential
No information available for the product

12.4. Mobility in soil
No information available for the product

12.5. Other
Section 13. DISPOSAL CONSIDERATIONS

13.1. Disposal methods
Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
